Notify Richard Sandoval for inspection at 530-643-1699 rsandoval@karuk.us

Responses to this Request for Proposals should include the following:

- 1) A statement of qualifications, including relevant project history.
- 2) A lump sum price, with attached price page. Line item charges

3) Names and telephone numbers of three client references.

Responses must be hand, mail, or email delivered by November 30th, 2020 no later than 4:00 p.m. (Pacific Standard Time) to:

Emma Lee Perez, Contract Compliance Specialist Karuk Tribe – Administration Office 64236 Second Avenue P.O. Box 1016 Happy Camp, CA 96039 Faxes will NOT be accepted Emails will be accepted at: emmaleeperez@karuk.us

Indian Preference will apply in the selection process in accordance with the Tribal Employment Rights Ordinance (TERO) and/or Indian Preference Act of 1934 (Title 25, USC, Section 47), based on funding source requirements.

All contracts that exceed \$2,500.00 shall be subject to a two percent (2%) Tribal Employment Rights Fee in accordance with the TERO Ordinance.

If applicable, construction contracts in excess of \$2,000, when required by Federal grant program legislation, are subject to compliance with the Davis-Bacon Act (40 USC 276a to a-7) as supplemented by Department of Labor regulations (29 CFR part 5).

		Scope of Work

- œ diagram) approximately 5-6ft in diameter and no less than 4 ft in height, in areas void of leave trees Except for leave logs, all slash will be placed in manageable tight compact piles for burning (see larger piles or wind rows can be built
- ့ Within 4 feet of each pile, all dead and down woody debris up to 6" in diameter shall be cut into approximately 4 ft lengths, gathered and piled
- 10. To minimize scorch, all piles should be built at least 6 feet away from boundaries, leave trees, snags, stumps or leave logs.
- 11. Piles should be covered with at two 4'x6' pieces of thick craft paper wax side up. The covering should come down at least half the height of the pile and ensure that material is piled on top to prevent the craft paper being blown off. Paper should be placed at least % of the height of the pile.
- 12. Piles shall not be built on stumps or down logs.
- 13. Must ad hear to all NEPA Documents.
- 14. All Invoices will be submitted no later than 30 days after completion.
- 15. Units with LOPS must be completed first
- 16. Work to be started on Units will be November 30,2020
- 17. Units must be completed No later than January 9, 2021

Prescriptions for Fuels Reductions:

**Cutters should abide by the following species preference; Black Oak, White Oak, Sugar pine, Dogwood, Yew, Cedar, Western Hemlock, Madrone, Chinquapin, Live Oak, Maple, Oregon Ash, bay (pepperwood), then tan oak.

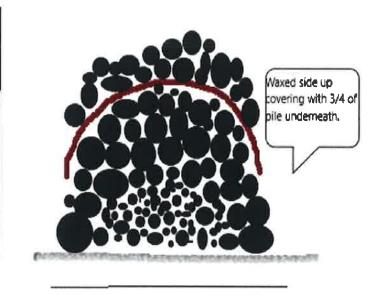

Contractor will cut most brush and conifers less than 4" DBH in units 2162,2155,2149,2288 and all other units will be up to 8" (leaving residuals in an approximate 15'x15' spacing or greater) and limb residual conifer and hardwoods to shoulder height. Favor the retention of species in order listed above.

Specific Work Requirement:

- Hardwoods, brush and conifers stump height no more than 4 inches from the ground as measured on the uphill side
- All live limbs shall be completely severed from the remaining stump/bole of tree
- Stumps shall not be cut at an acute angle
- · Limbing will be performed in such a way that no damage to bowl of limbed trees will occur
- On hardwoods such as tan oak and chinquapin where there are multiple stump sprouts, thin down to the healthiest largest three sprouts per clump.
- Slash shall not lean against or suspended on uncut vegetation
- Leave dead and down logs greater than 6" diameter on the larger end and buck to approximately 6 ft in length (leave logs)
- Except for leave logs, all slash will be placed in manageable tight compact piles for burning (see diagram) approximately 5-6ft in diameter and no less than 4 ft in height, in areas void of leave trees larger piles or wind rows can be built
- Within 4 feet of each pile, all dead and down woody debris up to 6" in diameter shall be cut into approximately 4 ft lengths, gathered and piled
- To minimize scorch, all piles should be built at least 6 feet away from boundaries, leave trees, snags, stumps or leave logs.
- Piles should be covered with at two 4'x6' pieces of thick craft paper wax side up. The covering should come down at least half the height of the pile and ensure that material is piled on top to prevent the craft paper being blown off. Paper should be placed at least ¾ of the height of the pile.
- Piles shall not be built on stumps or down logs
